ONIK DAS

Full Stack Web Developer

Address: Chattogram, Bangladesh | Phone: +880 1828347761 | Email: onikdas.dev@gmail.com
Linkedin | **Github** | **Portfolio**

CAREER OBJECTIVE

Final-year Diploma in Computer Science student and Full Stack Web Developer with hands-on experience in React.js, Next.js, and the MERN stack. Seeking a Web Developer role where I can build scalable, responsive web applications, contribute to real-world projects, and continuously improve my software engineering skills.

TECHNICAL SKILLS

Frontend: Next.js, React.js,Tailwind CSS,HTML5, CSS3
Backend: Node.js, Express.js, MongoDB, RESTful API Design, Better Auth, JWT
Programming Language: JavaScript (ES6+),TypeScript
Professional Soft Skills: Problem-Solving, Team Collaboration, Technical Documentation, Time Management

PROJECTS

1. FoodFlow — Online Food Delivery Platform

Team project (5 developers) · Role: Full-Stack Developer **Live Link** | **GitHub(Client)**

A collaborative full-stack food delivery platform featuring real-time tracking, multi-role dashboards, and secure payments.

Major Features

- Designed and implemented secure checkout workflows integrating Stripe card payments, dynamic coupon validations, and automated PDF invoice generation.
- Developed a zone-based location filtering system enabling seamless restaurant and food discovery across multiple user roles (Customer, Restaurant Partner, Rider).
- Engineered multi-role dashboards with real-time order lifecycle tracking and instant notifications powered by Socket.io and Leaflet GPS maps
- Collaborated within an engineering team of 5 developers to build core backend architectures, RESTful APIs, and scalable frontend components.

Tech Stack: Next.js, React, TypeScript, Node.js, Express.js, MongoDB, Socket.io, Stripe, Better Auth, React Hook Form, Zod, jsPDF, JWT, Tailwind CSS, Hero UI, Framer Motion

2. RecipeHub — AI-Powered Recipe Sharing Platform **Live Link** | **GitHub (Client)**

A comprehensive recipe-sharing platform featuring AI-powered recipe generation, interactive chatbot, and secure Stripe subscriptions.

Major Features

- Built an AI Recipe Generator enabling verified premium users to generate custom recipes instantly, alongside an interactive chatbot for real-time assistance.
- Integrated a secure payment gateway for efficient premium membership management and subscription handling.
- Implemented secure user authentication and role-based access control (RBAC) supporting distinct user permissions and dashboards.

Tech Stack: Next.js, Node.js, Express.js, JavaScript, MongoDB, Stripe, Gemini API, Better Auth, JWT, Tailwind CSS, Hero UI, Framer Motion,Recharts, jsPDF.

3. Wanderly — Tour and Travel Management Platform **Live Link** | **GitHub (Client)**

A modern tour booking platform featuring dynamic scheduling, secure online payments, and role-based management dashboards.

Major Features

- Developed a dynamic scheduling system featuring time-sensitive reservation workflows that automatically manage and expire tour availability.
- Integrated a secure online payment gateway with automated PDF invoice generation upon successful tour confirmation.
- Built a streamlined multi-tier management system enabling administrators to efficiently organize tour destinations and monitor user activities.

Tech Stack: Next.js, Node.js, Express.js, MongoDB, Stripe,TypeScript, Gemini API, Better Auth, JWT, Tailwind CSS, Hero UI, Framer Motion

EDUCATION

Diploma in Computer Science & Technology 2023 – Present
Chattogram Polytechnic Institute, Chattogram

Certifications & Training

AI Driven Full Stack Web Engineer — Programming Hero (2026) **Certificate**
AI Skills Training Programme — BRAC & AVPN (2026) **Certificate**
